

Candel Therapeutics to Host Virtual R&D Day on December 6, 2022

November 29, 2022

- *New clinical data to be presented from the Company's phase 2 clinical trial of CAN-2409 in combination with anti-PD-1 agents in patients with late-stage non-small cell lung cancer.*
- *Recent clinical data for CAN-3110 and CAN-2409 in high-grade glioma to be presented.*
- *Scientific rationale for the recently announced collaboration with the University of Pennsylvania using Candel's enLIGHTEN™ discovery platform to be discussed.*
- *Premier experts and thought leaders in immunology and oncology to share perspectives on broad, potential, therapeutic combination synergies and growing opportunity for Candel's novel immunotherapies.*

NEEDHAM, Mass., Nov. 29, 2022 (GLOBE NEWSWIRE) -- Candel Therapeutics, Inc. ("Candel" or "the Company") (Nasdaq: CADL), a clinical stage biopharmaceutical company developing novel viral immunotherapies, today announced it will host a virtual Research and Development (R&D) Day from 11:00 am – 1:30 pm ET on Tuesday, December 6, 2022.

Candel's first R&D Day will include presentations from its executive leadership, clinical investigators, scientific advisors, and key collaborators. The event will provide an extensive overview of the Company's viral immunotherapy approach and oncology-focused pipeline, with new data being presented from its phase 2 clinical trial of CAN-2409 in combination with anti-PD-1 agents in patients with stage III/IV non-small cell lung cancer (NSCLC). The event will conclude with an interactive Q&A session. [Click here](#) to register for the event.

The event will include the following presenters:

- **Introduction to Candel Therapeutics**
 - Paul Peter Tak, MD, PhD, FMedSci, President and Chief Executive Officer, Candel Therapeutics
- **Intratumor viral immunotherapy: a new approach to induce systemic anti-tumor immunity**
 - James P. Allison, PhD, Regental Professor and Chair of the Department of Immunology, MD Anderson Cancer Center and Director, Parker Institute for Cancer Research
- **Clinical perspective on viral immunotherapy**
 - Padmanee Sharma, MD, PhD, Professor of Genitourinary Medical Oncology and Immunology, MD Anderson Cancer Center
- **Phase 2 clinical trial of CAN-2409 treatment in NSCLC**
 - Charu Aggarwal, MD, MPH, Associate Professor for Lung Cancer Excellence, Perelman School of Medicine, University of Pennsylvania
 - Daniel H. Serman, MD, Professor and Director, Pulmonary, Critical Care and Sleep Medicine, NYU Langone Health
 - Roy Herbst, MD, PhD, Ensign Professor of Medicine, Professor of Pharmacology and Chief of Medical Oncology, Yale Cancer Center
- **Phase 1 clinical trial of CAN-2409 combined with nivolumab and standard of care in first-line treatment with high-grade glioma**
 - Patrick Y. Wen, MD, Director, Center for Neuro-Oncology, Dana-Farber Cancer Institute and Professor, Neurology, Harvard Medical School
- **Phase 1 clinical trial of CAN-3110 in recurrent high-grade glioma**
 - E. Antonio Chiocca, MD, PhD, Chair, Department of Neurosurgery, Brigham and Women's Hospital and Professor, Harvard Medical School
- **The enLIGHTEN™ Discovery Platform**
 - Francesca Barone, MD, PhD, Chief Scientific Officer, Candel Therapeutics
- **UPenn – Candel discovery partnership: Combination therapy to overcome CAR-T resistance in solid tumors**
 - Carl H. June, MD, Richard W. Vague Professor in Immunotherapy and Director, Center for Cellular Immunotherapies and Parker Institute for Cancer Therapy, Perelman School of Medicine, University of Pennsylvania
 - Neil C. Sheppard, DPhil, Adjunct Associate Professor of Pathology and Laboratory Medicine, Head of the T Cell

- **Interactive Q&A**

Registration for this virtual event and access to the live webcast and subsequent replay will be accessible under “Events and Presentations” on the Investors page of the Company’s website at <https://ir.candeltx.com/news-and-events/events-and-presentations> or by [clicking here](#).

About Candel Therapeutics

Candel is a clinical stage biopharmaceutical company focused on helping patients fight cancer with viral immunotherapies. Candel’s engineered viruses are designed to induce immunogenic cell death through direct viral-mediated cytotoxicity in cancer cells, thus releasing tumor neo-antigens while creating a pro-inflammatory microenvironment at the site of injection. Candel has established two viral immunotherapy platforms based on novel, genetically modified adenovirus and herpes simplex virus (HSV) constructs, respectively. CAN-2409 is the lead product candidate from the adenovirus platform and CAN-3110 is the lead product candidate from the HSV platform. Candel’s enLIGHTEN™ Discovery Platform is the first systematic, iterative HSV-based discovery platform leveraging human biology and advanced analytics to create new viral immunotherapies for solid tumors.
